

Resizing Images in Lightroom for Projection - A tutorial by Colin Tracy

With your Lightroom Library open, select the image you want to resize

Click the **Export** button (bottom LHS of left panel module next to **Import**)

The **Export One File** dialogue box will appear (see figure on next page)

Apply the following settings with reference to the figure

Export To	select Hard Drive from drop-down list
Export Location	<p>Export to: select Specific Folder</p> <p>Folder: choose the folder you want image to go to</p> <p>Put in Subfolder: Tick the box if you want image to go in a specific sub-folder, then name the subfolder</p> <p>Add to This Catalogue: Tick</p> <p>Existing Files: Ask what to do</p>
File Naming	<p>Rename To: Tick then select Custom Name from drop-down list</p> <p>Custom Text: name file exactly according to the club's competition format. For example: 01_Fred Bloggs_The Portrait_ 02_Fred Bloggs_The Landscape</p> <p>Extensions: select Lower Case from drop down list</p>
Video	Ignore
File Settings	<p>Image format: JPEG</p> <p>Quality: 100</p> <p>Color Space: sRGB</p>
Image Sizing	<p>Resize to fit: Tick then select Width & Height from drop-down list</p> <p>Choose pixels from drop-down list then type W:1400 H:1050</p> <p>Resolution: don't change (doesn't matter for projection)</p>
Output sharpening	<p>Some images may require sharpening at this stage. Try the following settings:</p> <p>Sharpen for: Tick then select Screen</p> <p>Amount: Select Low</p> <p>Use with care and check the images exported with and without sharpening to see what works best for you</p>
Metadata	Ignore
Watermarking	Ignore
Post-processing	After Export: Select Do Nothing from drop-down list

When you are happy with your selections, click the **Export** button

Find your image in folder or subfolder and check that the size is correct
