# Registering an account on Pixoroo

Before you are able to enter competitions using the Pixoroo software you must first register a personal account. Below are detailed instructions on how to do this.

1. In your browser open the Pixoroo home page https://pixoroo.com/public/account/login

2. On the home page click the '**Register**' box in the top right corner and from the dropdown menu select '**Club Members**' and complete the registration form ensuring all mandatory fields are completed. In the '**Verification Code'** box enter the club code, this can be obtained from the Competition Secretary. When the form is complete, please click '**Register**'. (if any mandatory field has a mistake or the box is left empty it will be highlighted and your registration will not be sent).

3. You will get an automated email response and so will the Competition Secretary asking him/her to verify you as a club member. The Competition Secretary can only see your name and a coded email address like this n****3@hotmail.com. After you have been confirmed on the system you will be sent a link from info@pixoroo.com which you should click on to confirm your registration has been successful and inviting you to login. There will be a last automated email advising you that your account has been verified.

4. Please then login and take a first look around.

Please contact the Competition Secretary at dcpccomp@gmail.com if you have any questions or problems.
