 3. **DIGITAL IMAGE:** *is an electronic digitalised photo which can be viewed on a computer, or a computerised device.*
Digital Images will be shown by projecting them onto a screen.
They have to be resized to fit within a landscape frame of:
1600 pixels wide x 1200 pixels high, including any border.
So your image size must be:
 - ✓ Landscape = 1600 px wide (max 1200 px high)
 - ✓ Portrait = 1200 pixels high**Colour space** (ICC profile /representation) = sRGB
Format = JPEG
- 
- Borders:** Dark photos may benefit from a fine border around the edge of the photo so that they stand out against the black background.
- Extra black canvas:** To stop your photo from being distorted and projected out-of-focus, "Add extra (black) canvas" to your image to make the total size up to 1600px x 1200px. Any added border must be included within this size.
4. **TITLING:** All photos to have a short title of words, not image numbers.
 - No names or titles within the image.
 - Titles to be just the title. Do **not** add your name, comp number, etc.**PRINTS:** to be titled on the reverse of the mount-board in top right hand corner. Prints will be displayed using this as orientation.
DIGITAL IMAGES: the title is displayed when the image file is opened.
Use 'save as' or 'rename' to title your Digital Image.
 5. **MONOCHROME:** The FIAP definition applies:
Monochrome: Mono = one, Chrome = colour. Eg: B+W, monotone, sepia, etc.
Addition of *partial* toning, or one or more colours, becomes a colour photo.
