GT-300DKH

Powerful grader blade in three working widths with high base weight and large wheels as standard. The blade is equipped with a unique turntable with interchangeable wearing plates. The GT-DKH blade is supplied with a hydraulic cylinder for setting the horizontal cutting angle.

Fransgård

The blade can be rotated hydraulically up to 230° and used to push earth or snow, as an example. All blades are fitted with reversible cutting edges.

The patented turntable has a modular design and is equipped with interchangeable wear discs, thus avoiding play in the turntable.

The GT-DKH models is supplied with a hydraulic cylinder for setting the horizontal angle to up to +/- 20°. The hydraulic cylinder for left/right offset adjustment is optional on all models.

The robust suspension and three-point hitch offers two options for adjusting the lift arms as well as a top bar bracket with two fixed holes. It also has an oval groove, which allows it to follow the terrain more effectively.

The large wheels can be easily set and rotated 360°, which allows the possibility of reversing the cutting edge without turning the blade, and ensures optimal levelling.

Large selection of OPTIONS ARE AVAILABLE: Snow blades, edge blades, shock valve with or without accumulator, (photo) rubber cutting edge and valve block in case of insufficient outlets on the tractor

Technical data:	GT-250DK/DKH	GT-275DK/DKH	GT-300DK/DKH
Working width	2.5 m/2.5 m	2.75 m/2.75 m	3.0 m/3.0 m
