

Schooled

schooled-

adjective

educated or trained in a specified activity or in a particular way.

There was a time I would go after school to my local schoolyard to use the school's field for soccer practice or the basketball court for a little friendly game of one on one with my brother. School properties are not accessible anymore. Ever since the increase of mass school shootings, local authorities created new security measures, including erecting fencing around school properties and schooling children in active-shooter drills in hopes of saving their lives.

The images in this issue were made when schools were safe, where you learned and played during recess, and not think about being shot or killed.
